

TAN ZE XIANG

BANKING BUSINESS ANALYST | CREDIT OPERATIONS & FINANCIAL SYSTEMS

Kuala Lumpur, Malaysia | tanzexiang8@gmail.com | linkedin.com/in/tan-ze-xiang-3b213a143 | github.com/Xiang13-gif

PROFESSIONAL SUMMARY

Banking Business Analyst with 6+ years of experience supporting loan origination, business credit, retail banking, and foreign-exchange system change. Skilled in requirement analysis, functional clarification, UAT and regression, defect triage, root-cause investigation, traceability, production verification, and stakeholder coordination. Combines banking-domain understanding with SQL, log, API, data, and UI/backend reasoning.

PROFESSIONAL EXPERIENCE

BUSINESS ANALYST

Hitachi eBworx | Apr 2023 - Present

Loan Origination | Business Credit | Retail Banking | FX Deal System

- Analyze and translate requirements across business, operations, and technology stakeholders for banking system enhancements.
- Maintain requirement-to-test traceability and support VSIT, SIT, UAT, regression, and production verification across interconnected modules.
- Prepare reusable test assets, review UI and system behavior, and validate functional, interface, and backend outcomes with delivery teams.
- Facilitate defect triage and root-cause investigation using reproducible evidence, logs, business impact, and controlled retest scope.
- Support document-generation automation, field mapping, template validation, output verification, and operational documentation.
- Coordinate release readiness, post-release monitoring, issue follow-up, and stakeholder decisions.

ASSOCIATE BUSINESS ANALYST

Hitachi eBworx | Sep 2019 - Apr 2023

Requirement Documentation | UAT | Defect Management | Production Support

- Translated business requirements into functional specifications and testable behavior for SIT, UAT, and regression delivery.
- Prepared and maintained test cases, evidence templates, execution status, and end-to-end audit records.
- Coordinated defect ownership, business-impact clarification, retest evidence, closure decisions, and release-day verification.
- Used JIRA, Confluence, and HP ALM to manage requirements, test execution, defects, traceability, and delivery communication.
- Supported users after go-live by reproducing reported issues and coordinating resolution within agreed service expectations.

CORE CAPABILITIES

Business Analysis

Requirements, functional specification, process mapping, impact analysis, business rules, acceptance criteria, traceability

Testing & Delivery

VSIT, SIT, UAT, regression, defects, retest evidence, production verification, release support

Banking Domain

Loan origination, business credit, credit operations, retail banking, FX dealing, approval and document controls

Technical Collaboration

SQL, log analysis, API awareness, data validation, UI/backend behavior, GitHub, TypeScript portfolio execution

SELECTED CONTRIBUTION HIGHLIGHTS

- Built and maintained reusable test assets and structured evidence to support repeatable execution and audit readiness.
- Reviewed UI and system behavior with business and technology teams to align functional outcomes with user needs.
- Supported document automation through dynamic field mapping, template validation, and Word/PDF output verification.
- Used monitoring views, logs, and structured follow-up to improve visibility and investigation after release.
- Supported a temporary FX deal-system assignment requiring fast domain learning and regulated-process awareness.

SELECTED PORTFOLIO EVIDENCE

CreditFlow BA Toolkit - Independent portfolio project using mock data and generalized commercial-credit workflows.

- Connects requirements, business rules, approval routing, document controls, UAT, defects, change impact, traceability, and release readiness.
- Includes strict TypeScript, business-rule tests, Playwright workflow tests, OpenAPI, SQL, BA documents, CI, public GitHub history, and a live demo.
- GitHub: github.com/Xiang13-gif/business-credit-system-enhancement-case-study

EDUCATION, TOOLS & LANGUAGES

Bachelor of Computer Science (Internet Technology)

Tunku Abdul Rahman University College | 2017 - 2019

Diploma in Computer Science (Internet Technology)

University of Tunku Abdul Rahman | 2015 - 2017

Tools: JIRA, Confluence, HP ALM, SQL, Microsoft Office, document-generation tooling, GitHub.

Methods: Agile and Waterfall delivery, BRD/FSD/RTM documentation, flowcharts, ER and sequence diagrams, user journey mapping.

Languages: English, Chinese, Malay.

Professional training: Business Analysis, Manual Testing, Software System Testing, Agile Analysis.

PUBLIC PORTFOLIO DISCLAIMER

Portfolio projects use mock data and generalized banking workflows. No confidential client, customer, policy, requirement, screenshot, or production information is published.
